

Sonoma State University

Temporary Alternative Access Plan (TAAP)

Formerly, Equally Effective Alternative Access Plan (EEAAP).

ICT Product Information

Product Name: Anatomy LT

Version: Click or tap here to enter text.

Vendor Contact: Jessica Nguyen (j.nguyen@adinstruments.com)Click or tap here to enter text.

Temporary Alternate Access Plan Creation Date: June 8th 2026

Referenced Documentation

Upload the referenced documents to the [ATI Systemwide ACR Repository \(SharePoint Login Credentials Required\)](#). Create a product folder for the ICT if one does not already exist. Once uploaded, generate links and place them below:

- | | |
|--|---------------------|
| • Product Accessibility Conformance Report (ACR) | link, if applicable |
| • Vendor Accessibility Demonstration Results | link, if applicable |
| • Manual or Automated Testing Results: | link, if applicable |
| • Vendor Accessibility Roadmap: | link, if applicable |

Known Accessibility Barriers

Describe the known accessibility barriers that affect core functionality.

The product has several issues that impact visually impaired users such as insufficient color contrast requirements, missing alt-text for questions, keyboard traps, color as the only differentiator, the names of controls are not made available to assistive tech, text resizing does not work, and status messages are not made available to assistive tech. As well as barriers for users with hearing impairments such as a lack of captioning for audio tracks. Lastly, timing is not adjustable for some messages, the content announced while using screen readers is different than that shown visually,

Affected User Groups

Choose all that apply.

☒ Blindness

<https://ati.calstate.edu/ati-priority-areas/procurement/temporary-alternate-access-planning>
<https://access.sfsu.edu/ati/procurement/eeaaap>

Version 3.2 051225

- ☒ Low Vision
- ☒ Deafness
- ☒ Hard of Hearing
- ☒ Limited Manual Dexterity
- ☒ Cognitive Disability
- ☐ Speech Disabilities
- ☐ Photosensitivity
- ☒ Limited Reach and Strength

Proposed Alternative

Please provide details on the proposed alternative solution.

Describe how the proposed alternative will address the barrier(s), describe the resources required or personnel, and name the responsible department.

As this product is only used in lab settings where students are paired with partners, the professor will designate one student as the active partaker in the physical lab activities and another as the note taker. Any students who have disabilities that will impair their ability to use this product will already be paired with a student who will assist them should they encounter any difficulties in using this product alongside any additional in class supports they may already have. The professor and/or teachers assistants will be available to assist as well.

Product Specific Accessibility Statement

Draft a concise accessibility statement tailored specifically to this product (not your general campus-wide accessibility statement) that includes:

- ☐ Known barriers in the product interface.
- ☒ Impacted disability groups.
- ☐ Link or reference to this document.
- ☒ Add a disclaimer: best effort was made, but unknown barriers may remain.
- ☒ Provide contact for further accessibility assistance.

<https://ati.calstate.edu/ati-priority-areas/procurement/temporary-alternate-access-planning>
<https://access.sfsu.edu/ati/procurement/eeaap>

Version 3.2 051225

(Post this statement wherever the product is available and in use.)

The LT Anatomy product has been reviewed by the SFBRN ATI team and found to pose a barrier to users in the following disability groups: Blind, Low Vision, Deaf, Hard of Hearing, Limited Manual Dexterity, Cognitive Disabilities, Limited Reach and Strength. It is possible that users outside of these disability groups may face barriers in using this product. Should a user wish to seek further assistance or report barriers to accessibility within the product, they should contact the Department of Biology (biology@sonoma.edu; (707) 664 – 2189).

Communication and Distribution

The document must be easily referenced. Indicate which of the following actions have been taken:

- ☒ **Posted the Accessibility Statement in course syllabi (if applicable).**
- ☒ **Posted the Accessibility Statement where the product is accessed.**
- ☒ **Provided copies of this document to Requesting Department/Area.**
- ☐ **Provided copies of this document to Disability Services Office.**
- ☐ **Provided copies of this document to Human Resources (ADA Coordinators).**
- ☐ **Provided copies of this document to IT Help Desk.**
- ☒ **Saved the document in the [ATI Systemwide ACR Repository \(SharePoint Login Credentials Required\)](#)**
- ☐ **Other: [Specify]**

Review the proposed solution to determine if it meets the following legal requirements to be equally effective. A non-equal alternative or individualized accommodation will be required if it does not.

Requirements Checklist

To qualify as an Equally Effective Alternative, the plan must meet **ALL** the following:

- ☒ **Allows access to the same information, engagement, and services.**
- ☒ **Offers the same availability as the primary solution.**
- ☐ **Can be accessed independently without additional assistance.**

<https://ati.calstate.edu/ati-priority-areas/procurement/temporary-alternate-access-planning>
<https://access.sfsu.edu/ati/procurement/eeaap>

Version 3.2 051225

- ☒ Does not result in disparate burden or impact on the user.
- ☒ Has substantially equivalent ease of use.
- ☒ Protects the privacy of the individuals affected.
- ☒ Saved the document in the [ATI Systemwide ACR Repository \(SharePoint Login Credentials Required\)](#)
- ☐ Other: [Specify]

Process Outcome

Based on the assessment above, the outcome of the Temporary Alternate Access Plan is:

- ☐ **Meets all six legal requirements: Equally Effective.** The proposed solution fully meets all legal requirements for equally effective access, presenting minimal risk to the institution. In general, no individual accommodations are expected to be necessary. Non-conforming minimal impact on access.
- ☒ **Meets some (1-5) legal requirements: Partially Equally Effective.** While the solution partially addresses accessibility, it may still require supplemental assistance for users. This carries a moderate risk to the institution, and staff should be prepared to provide additional support for affected individuals.
- ☐ **Unable to provide alternative means of access: Need for Individualized Accommodation.** If no effective alternative solution is available, individualized accommodations must be provided for each affected user. This requires alerting the disability services and human resources offices. **The department responsible for obtaining the product may face additional costs to cover individualized accommodations,** and this scenario presents a high risk to the institution.

Institutional Risk

- ☐ **HIGH:** No alternative access provided (Supports 0 criteria)
- ☒ **MODERATE:** Non-Equal Alternative Access (Supports 1-5 criteria)
- ☐ **LOW:** Equally Effective Alternative Access (Supports all 6 criteria)

Accommodation Requirements

- ☐ **HIGH:** Accommodations required for all users (Supports 0 criteria)
- ☒ **MODERATE:** Accommodations required for some users (Supports 1-5 criteria)

<https://ati.calstate.edu/ati-priority-areas/procurement/temporary-alternate-access-planning>
<https://access.sfsu.edu/ati/procurement/eeaap>

Version 3.2 051225

- ☐ **LOW:** Accommodations required for minimal number of users (Supports all 6 criteria)

Administrative Approval

By signing below, each approver confirms that they have reviewed the proposed temporary alternative means of access, evaluated the associated institutional risks and accommodation requirements, and determined that this plan serves as an acceptable interim solution for meeting applicable compliance and legal obligations.

Role	Name	Signature	Date
Department Chair/Manager	Sean P. Place	<i>Sean P. Place</i>	06/11/2026
Dean/Division Vice President	Dr. Elisabeth Wade	<i>[Signature]</i>	06/11/2026

Next Review

The document should be reviewed and updated annually or when renewing the ICT, as TAAPs are temporary solutions until the vendor resolves accessibility issues.

Review of this document should occur on or before [June 11th, 2027]

In the event of Vendor Non-Compliance

TAAPs are intended to be temporary and are only valid when regularly reviewed to confirm that the vendor is actively working to remediate their ICT accessibility barriers.

If this document is under review and there is no measurable progress from the vendor, its continued validity may be questioned. Should there be no improvement at the time of the annual review, a formal memo must be prepared for the requesting department and signed by the institution's highest executive leadership.

This memo should state that the vendor has failed to meet its commitment to address the known accessibility barriers in its product. It should also explain why an alternative solution is not being pursued at this time.

A copy of this memo may be shared with the vendor.

This process should be repeated annually for as long as the institution continues to accept the associated high risk.

Miscellaneous Notes

Sara M. met with Stephanie Thibault, Derek J. Girman, and Aiyana Singh to discuss the products use, possible accommodations and other important details regarding the creation of the TAAP on Jun 11th, 2026 @2pm via Zoom. Due to the incoming change in the Biology Department Chairs, it was decided by Amanda McGowan that the current Chair Sean P. Place should sign the TAAP now, then when Derek J. Girman takes the position of Chair come August, the agreement will be re-signed by Derek J. Girman to maintain the agreements efficacy and validity.

Notice to all Parties

The Temporary Alternate Access Plan should only serve as an interim measure while the vendors address the underlying barriers to full accessibility. As of April 24, 2026, Title II of the ADA requires all ICT (Information and Communication Technology) to be fully accessible. In most circumstances, Title II §35.205 also applies.

While we may not yet meet every technical standard, we will use TAAPs to comply with §35.205, which deems that a public entity not in full compliance with §35.200(b) is still considered compliant if the noncompliance has minimal impact on access and does not prevent individuals with disabilities from:

- Accessing the same information as individuals without disabilities;
- Engaging in the same interactions as individuals without disabilities;
- Conducting the same transactions as individuals without disabilities; and
- Otherwise participating in or benefiting from the same services, programs, and activities as individuals without disabilities.

Our goal is 100% compliance, and we will rely on TAAPs only until these barriers are fully resolved.

Legal Framework

- [Section 504 of the Rehabilitation Act of 1973](#) and [Section 508 of the Rehabilitation Act of 1973](#)
- [Americans with Disabilities Act Title II Regulations](#)
- [California Government Code 11135](#) and [California Government Code 7405](#)
