

VPAT Accessibility Compliance — Summary Report

ScreenSteps | Version: [VERSION NOT SPECIFIED IN VPAT] | Evaluation Date:
July 07, 2026

Product	ScreenSteps
Version	[VERSION NOT SPECIFIED IN VPAT]
Vendor	ScreenSteps
Vendor Report Date	March 2, 2022 (vendor lists "Last updated 3/2/2022")
VPAT Edition	VPAT® Version 2.4, WCAG Edition
Standards Reviewed	WCAG 2.0 Level A, WCAG 2.0 Level AA, WCAG 2.1 Level A, WCAG 2.1 Level AA
Prepared By	Jonathan Hale
Organization	San Francisco Bay Region Network (SFBRN)
Vendor Contact	(866) 275-7856 · support@screensteps.com
SFBRN Contact	accessibility@sfbrn.org · j.hale@csueastbay.edu

This summary report was prepared by San Francisco Bay Region Network (SFBRN) from the vendor-submitted Voluntary Product Accessibility Template (VPAT) for ScreenSteps. It restates vendor conformance claims, identifies accessibility barriers at WCAG 2.1 Level AA, and provides plain-language explanations and practical workarounds for faculty, staff, auditors, and procurement reviewers. It is not an independent audit of the product.

Executive Summary

ScreenSteps — Knowledge base software that reduces mistakes, questions, and onboarding time. Vendor note: “Only the customer facing Knowledge Based View was VPAT assessed (not admin area).” SFBRN reviewed the vendor-submitted VPAT against the WCAG 2.1 Level AA success criteria. The review evaluated 20 Level AA criteria, of which 2 were reported Not Applicable and excluded from scoring per SFBRN policy; of the 18 reviewable criteria, 13 were fully supported, producing an SFBRN compliance score of **72%** — below the SFBRN 90% threshold. A total of **5 Level AA barrier(s)** were identified, centering on headings and labels, language of parts, consistent navigation, error suggestion, status messages; documented workarounds appear in Section 3 of this report. 2 additional criteria were reported Not Applicable and are documented transparently in Section 2 as known gaps. Reviewers should also note that the vendor report date (March 2, 2022 (vendor lists “Last updated 3/2/2022”)) is more than 12 months older than this review date, so the claims may not reflect the current product; SFBRN recommends requesting an updated VPAT from the vendor.

72%

WCAG 2.1 Level AA compliance (SFBRN threshold: 90%)

Score falls below the 90% SFBRN threshold.

Outdated VPAT notice: The vendor report date (March 2, 2022 (vendor lists “Last updated 3/2/2022”)) is more than 12 months older than the SFBRN review date (July 07, 2026), exceeding the SFBRN VPAT currency window. An updated vendor VPAT should be requested, and unverified claims should be treated with caution.

Impact Assessment

Audience / Users	21+ users (campus-wide)
Access for Users with Disabilities	Limits some access
Legal Exposure	Medium

Deployment Scope	Campus-wide
Suggested Impact Level	Medium
Final Impact Level	Medium

Basis for Impact Determination:

- Reviewer determined this product limits access for some users with disabilities.
- Product is deployed campus-wide or serves 21+ users, amplifying the impact of any accessibility barrier.
- Medium legal exposure identified.
- Compliance score of 72% indicates moderate accessibility gaps.

Medium Impact — Department Review Recommended. Identified barriers may affect some users in meaningful ways. SFBRN recommends a departmental accessibility review before final procurement approval. Standard workarounds are documented in Section 3.

Section 1 — Product and Description

Product Name	ScreenSteps
Version	[VERSION NOT SPECIFIED IN VPAT]
Vendor	ScreenSteps
Description	Knowledge base software that reduces mistakes, questions, and onboarding time. Vendor note: "Only the customer facing Knowledge Based View was VPAT assessed (not admin area)."
Product Type	Web-based knowledge base / documentation platform (SaaS)
VPAT Date	March 2, 2022 (vendor lists "Last updated 3/2/2022") — flagged as outside the 12-month currency window
VPAT Edition	VPAT® Version 2.4, WCAG Edition
Evaluation Date	July 07, 2026
Evaluated By	Jonathan Hale, Accessibility Compliance Reviewer, SFBRN
Vendor Contact	(866) 275-7856 · support@screensteps.com

Vendor Evaluation Methods

The vendor reports that conformance was assessed using Manual Testing and the WAVE Tool (WebAIM's Web Accessibility Evaluation Tool), supplemented in individual remarks by Google Chrome's accessibility inspector.

Applicable Standards / Guidelines

Standard / Guideline	Included in Report
WCAG 2.0 Level A	Yes
WCAG 2.0 Level AA	Yes
WCAG 2.0 Level AAA	Yes
WCAG 2.1 Level A	Yes
WCAG 2.1 Level AA	Yes
WCAG 2.1 Level AAA	Yes
Section 508 (Revised 2017)	No

Terms and Status Definitions

Status	Definition
Supports	The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
Partially Supports	Some functionality of the product does not meet the criterion.
Does Not Support	The majority of product functionality does not meet the criterion.
Not Applicable	The criterion is not relevant to the product.
Not Evaluated	The product has not been evaluated against the criterion.

Section 2 — Identified Barriers (Level AA)

This section lists every WCAG 2.1 **Level AA** criterion that the vendor reported as anything other than “Supports” — including “Partially Supports,” “Does Not Support,” “Not Evaluated,” and “Not Applicable.” Not Applicable items are documented transparently as known gaps per SFBRN policy but are **excluded from the compliance score**, since the underlying feature is not present in the product. Fully supported criteria are excluded; no workarounds are needed for them. Vendor remarks are reproduced verbatim and unaltered; SFBRN adds only the quoted criterion text and a plain-language explanation. 7 of 20 Level AA criteria appear below.

1.2.4 Captions (Live)

“Captions are provided for all live audio content in synchronized media.” — WCAG 2.1 Quick Reference

What this means: Live video with sound (webinars, live streams) must have real-time captions so people who are deaf or hard of hearing can participate as it happens. The vendor reports this criterion as Not Applicable; per SFBRN policy it is documented transparently as a known gap and is excluded from the compliance score.

Level AA

Not Applicable

Vendor Remarks: ScreenSteps does not use synchronized media.

2.4.6 Headings and Labels

“Headings and labels describe topic or purpose.” — WCAG 2.1 Quick Reference

What this means: Headings and form labels must be clear and descriptive so users can understand and navigate the content quickly.

Level AA

Partially Supports

Vendor Remarks: Pages have descriptive headings and labels. Labels are unique contextual.

3.1.2 Language of Parts

"The human language of each passage or phrase in the content can be programmatically determined, except for proper names, technical terms, words of indeterminate language, and words that are part of the vernacular." — WCAG 2.1 Quick Reference

What this means: Words or passages in a different language should be marked as such so a screen reader switches pronunciation correctly.

Level AA

Partially Supports

Vendor Remarks: Article contents are NOT limited to English and can also have combination of multiple languages all together. Refers to the HTML language(lang) attribute.

3.2.3 Consistent Navigation

"Navigational mechanisms that are repeated on multiple web pages occur in the same relative order each time they are repeated, unless a change is initiated by the user." — WCAG 2.1 Quick Reference

What this means: Menus and navigation should stay in the same place and order across pages so users can rely on them.

Level AA

Partially Supports

Vendor Remarks: Navigation models are consistent across pages and use headings and ARIA navigation landmarks to help orient users.

3.3.3 Error Suggestion

"If an input error is automatically detected and suggestions for correction are known, the suggestions are provided to the user, unless it would jeopardize the security or purpose of the content." — WCAG 2.1 Quick Reference

What this means: When the system knows how to fix an input error, it should suggest the correction (for example, a valid date format).

Level AA

Partially Supports

Vendor Remarks: Error messages are communicated using a combination of ARIA alerts, ARIA landmarks, headings and links.

3.3.4 Error Prevention (Legal, Financial, Data)

"For pages that cause legal commitments or financial transactions, that modify or delete user-controllable data, or that submit test responses, submissions are reversible, checked, or confirmed." — WCAG 2.1 Quick Reference

What this means: Before finalizing something important (a purchase, a legal form, deleting data), users must be able to review, correct, or undo it. The vendor reports this criterion as Not Applicable; per SFBRN policy it is documented transparently as a known gap and is excluded from the compliance score.

Level AA

Not Applicable

Vendor Remarks: ScreenSteps does not process financial and PII transactions.

4.1.3 Status Messages

"In content implemented using markup languages, status messages can be programmatically determined through role or properties such that they can be presented to the user by assistive technologies without receiving focus." — WCAG 2.1 Quick Reference

What this means: Status updates (like "item added to cart" or "5 results found") must be announced by a screen reader without moving focus away from the user's task.

Level AA

Partially Supports

Vendor Remarks: Status Messages have ARIA attributes.

Section 3 — Workarounds

The workarounds below let SFBRN faculty, staff, and students complete tasks despite the barriers identified in Section 2. They rely on standard assistive technologies (AT), browser and operating system accessibility settings, and free or low-cost third-party tools. Workarounds are interim measures — they do not replace vendor remediation of the underlying barriers. Fully supported criteria do not require workarounds.

General Assistive Technology Compatibility

Users should keep assistive technology current. Mainstream screen readers — JAWS and NVDA on Windows, VoiceOver on macOS/iOS, TalkBack on Android, Orca on Linux, and ChromeVox on Chrome OS — generally operate standards-based web and desktop products, subject to the partial-support caveats described in Section 2. Browser zoom, reflow, and high-contrast settings can compensate for many contrast and focus-visibility issues.

Workarounds by Criterion

1.2.4 Captions (Live)

- Use Google Live Transcribe (free, Android) or Otter.ai (free tier available) for real-time transcription of live sessions.
- Microsoft Teams, Zoom, and Google Meet all offer built-in live captions that can be used alongside this product.
- Request that the vendor enable WebVTT caption support for any live video features.
- Students needing live captioning should contact Disability Services for a CART (Communication Access Realtime Translation) provider.

2.4.6 Headings and Labels

- Use NVDA's Headings List (Insert+F7 > Headings tab) to review all heading labels and identify ambiguous ones.
- Use JAWS's Headings List (Insert+F6) for the same purpose.
- When buttons are identically labeled, use NVDA's Object Properties (Insert+Tab) to read the full accessible name.
- Request the vendor add unique, descriptive labels to all repeated buttons and form fields.

3.1.2 Language of Parts

- Set your screen reader to auto-detect language changes: in NVDA, enable 'Automatic language switching' under Preferences > Speech.
- If pronunciation is incorrect for a foreign phrase, manually switch your screen reader's language while reading that section.
- Request the vendor add lang attributes to all content in languages other than the primary page language.

3.2.3 Consistent Navigation

- Use browser bookmarks to navigate directly to frequently used sections, bypassing inconsistent navigation.
- Use the browser's back button and history to retrace navigation paths when menus appear in unexpected positions.

3.3.3 Error Suggestion

- If the application does not suggest a correction, look for inline help text or tooltips near the error field.
- Use the browser's built-in spell-check and form validation to catch errors before submitting.
- Request the vendor add specific error suggestions using aria-describedby on error messages.

3.3.4 Error Prevention (Legal, Financial, Data)

- Before submitting any important form, take a screenshot or copy your input so you can reconstruct it if needed.
- Check whether the application sends a confirmation email — that serves as a record of submission.
- If the form has a review step, use it even if it appears optional.
- Faculty should document submission steps for students in case data is lost.

4.1.3 Status Messages

- After performing an action, manually navigate to the top of the page with Ctrl+Home and read downward to catch status messages.
- Use NVDA's Browse Mode and read from the current position with the Down arrow to catch announcements.
- Enable NVDA's 'Report changes to progress bars' in Preferences > Object Presentation to catch progress updates.
- Refresh the page after an action to confirm whether the action was successful.
- Request the vendor add aria-live='polite' regions to all status and notification areas.

Operating-System Accessibility Settings

Operating System	Key Accessibility Settings
Windows	Settings ■ Accessibility offers Narrator (built-in screen reader), Magnifier (Win + Plus), high-contrast themes, text scaling, and Voice Typing (Win + H) — useful for enlarging vague labels and dictating form input.
macOS	System Settings ■ Accessibility provides VoiceOver (Cmd + F5), Zoom, Increase Contrast, Reduce Motion, and per-language VoiceOver voices.
Linux	GNOME Settings ■ Accessibility includes the Orca screen reader, full-screen magnifier, high-contrast mode, and large-text settings.

Third-Party Assistive Applications

Tool Name	Description	URL
NVDA (NonVisual Desktop Access)	Free, open-source screen reader for Windows that reads screen content aloud and supports braille displays.	https://www.nvaccess.org
VoiceOver	Built-in screen reader for macOS and iOS devices that provides speech and braille output.	https://www.apple.com/accessibility/vision

Tool Name	Description	URL
Narrator	Free screen reader included in Windows that reads text and UI elements aloud.	https://support.microsoft.com/windows/narrator-guide
TalkBack	Android's built-in screen reader that enables spoken feedback and gesture navigation.	https://support.google.com/accessibility/android
Orca	Free, open-source screen reader for Linux systems using speech and braille output.	https://orca.gnome.org
ChromeVox	Screen reader built into Chrome OS for Chromebook users.	https://support.google.com/chromebook
NaturalReader	Text-to-speech software that converts documents, PDFs, and web pages into spoken audio (free tier available).	https://www.naturalreaders.com
Voice Dream Reader	Mobile app that reads ebooks and documents aloud with customizable voices and accessibility features.	https://www.voicedream.com/reader
Read&Write;	Literacy support tool with text-to-speech, word prediction, and comprehension aids (free version available).	https://www.texthelp.com/products/read-and-write
Balabolka	Free Windows text-to-speech program with customizable voices and file export options.	http://www.cross-plus-a.com/balabolka.htm
WordTalk	Free Microsoft Word plugin that reads documents aloud and supports speech customization.	https://www.wordtalk.org.uk
Google Live Transcribe	Real-time speech-to-text app for Android that provides captions for conversations.	https://play.google.com/store/apps/details?id=com.google.audio.hearing.visualization.accessibility.scribe
Otter.ai	Speech-to-text transcription tool for meetings and lectures (free plan available).	https://otter.ai

Tool Name	Description	URL
Microsoft Dictate	Free speech-to-text add-in for Microsoft Office that converts spoken words into text.	https://dictate.ms
Seeing AI	AI-powered app that narrates the world (text, people, objects) for visually impaired users.	https://www.microsoft.com/ai/seeing-ai

Section 4 — Summary Report

ScreenSteps is Knowledge base software that reduces mistakes, questions, and onboarding time. Vendor note: “Only the customer facing Knowledge Based View was VPAT assessed (not admin area).”, and the vendor's VPAT reports that 13 of the 18 reviewable WCAG 2.1 Level AA criteria are fully met, for an SFBRN compliance score of **72%**, below the SFBRN 90% threshold. People who rely on assistive technology may run into 5 partially or unsupported area(s); practical workarounds exist for every identified barrier, including navigating by headings or landmarks, using persistent search, and pairing the product with free tools such as NVDA, VoiceOver, Otter.ai, or Read&Write. 2 criteria the vendor marks as Not Applicable are recorded transparently as known gaps. The product has been assigned an impact level of **Medium**. Because the vendor's VPAT is outside the SFBRN 12-month currency window, SFBRN recommends requesting a current VPAT and independent third-party testing of the criteria the vendor did not evaluate before final procurement approval.

WCAG 2.1 Success Criteria Section A — Perceivable

Criterion	Level	Status	Remarks and Explanations
1.1.1 Non-text Content	Level A	Partially Supports	Partial support reported by vendor.
1.2.1 Audio-only and Video-only (Prerecorded)	Level A	Supports	—
1.2.2 Captions (Prerecorded)	Level A	Not Applicable	No prerecorded media.

Criterion	Level	Status	Remarks and Explanations
1.2.3 Audio Description or Media Alternative (Prerecorded)	Level A	Not Applicable	No prerecorded media.
1.2.4 Captions (Live)	Level AA	Not Applicable	ScreenSteps does not use synchronized media.
1.2.5 Audio Description (Prerecorded)	Level AA	Supports	—
1.3.1 Info and Relationships	Level A	Supports	—
1.3.2 Meaningful Sequence	Level A	Supports	—
1.3.3 Sensory Characteristics	Level A	Supports	—
1.3.4 Orientation	Level AA	Supports	—
1.3.5 Identify Input Purpose	Level AA	Supports	—
1.4.1 Use of Color	Level A	Supports	—
1.4.2 Audio Control	Level A	Supports	—
1.4.3 Contrast (Minimum)	Level AA	Supports	—
1.4.4 Resize Text	Level AA	Supports	—
1.4.5 Images of Text	Level AA	Supports	—
1.4.10 Reflow	Level AA	Supports	—
1.4.11 Non-text Contrast	Level AA	Supports	—
1.4.12 Text Spacing	Level AA	Supports	—

Criterion	Level	Status	Remarks and Explanations
1.4.13 Content on Hover or Focus	Level AA	Supports	—

WCAG 2.1 Success Criteria Section B — Operable

Criterion	Level	Status	Remarks and Explanations
2.1.1 Keyboard	Level A	Supports	—
2.1.2 No Keyboard Trap	Level A	Supports	—
2.1.4 Character Key Shortcuts	Level A	Supports	—
2.2.1 Timing Adjustable	Level A	Supports	—
2.2.2 Pause, Stop, Hide	Level A	Not Applicable	No moving content.
2.3.1 Three Flashes or Below Threshold	Level A	Supports	—
2.4.1 Bypass Blocks	Level A	Partially Supports	Skip links present on most templates.
2.4.2 Page Titled	Level A	Supports	—
2.4.3 Focus Order	Level A	Supports	—
2.4.4 Link Purpose (In Context)	Level A	Supports	—
2.4.5 Multiple Ways	Level AA	Supports	—
2.4.6 Headings and Labels	Level AA	Partially Supports	Pages have descriptive headings and labels. Labels are unique contextual.
2.4.7 Focus Visible	Level AA	Supports	—

Criterion	Level	Status	Remarks and Explanations
2.5.1 Pointer Gestures	Level A	Supports	—
2.5.2 Pointer Cancellation	Level A	Supports	—
2.5.3 Label in Name	Level A	Supports	—
2.5.4 Motion Actuation	Level A	Not Applicable	No motion actuation.

WCAG 2.1 Success Criteria Section C — Understandable

Criterion	Level	Status	Remarks and Explanations
3.1.1 Language of Page	Level A	Supports	—
3.1.2 Language of Parts	Level AA	Partially Supports	Article contents are NOT limited to English and can also have combination of multiple languages all together. Refers to the HTML language(lang) attribute.
3.2.1 On Focus	Level A	Supports	—
3.2.2 On Input	Level A	Supports	—
3.2.3 Consistent Navigation	Level AA	Partially Supports	Navigation models are consistent across pages and use headings and ARIA navigation landmarks to help orient users.
3.2.4 Consistent Identification	Level AA	Supports	—
3.3.1 Error Identification	Level A	Supports	—
3.3.2 Labels or Instructions	Level A	Partially Supports	Labels present; some instructions missing.

Criterion	Level	Status	Remarks and Explanations
3.3.3 Error Suggestion	Level AA	Partially Supports	Error messages are communicated using a combination of ARIA alerts, ARIA landmarks, headings and links.
3.3.4 Error Prevention (Legal, Financial, Data)	Level AA	Not Applicable	ScreenSteps does not process financial and PII transactions.

WCAG 2.1 Success Criteria Section D — Robust

Criterion	Level	Status	Remarks and Explanations
4.1.1 Parsing	Level A	Partially Supports	Minor parsing issues.
4.1.2 Name, Role, Value	Level A	Partially Supports	Name, role, value mostly exposed.
4.1.3 Status Messages	Level AA	Partially Supports	Status Messages have ARIA attributes.

Section 508 — Functional Performance Criteria (Chapter 3)

Criterion	Level	Conformance Status	SFBRN Note
302.1 Without Vision	FPC	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
302.2 With Limited Vision	FPC	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
302.3 Without Perception of Color	FPC	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
302.4 Without Hearing	FPC	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.

Criterion	Level	Conformance Status	SFBRN Note
302.5 With Limited Hearing	FPC	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
302.6 Without Speech	FPC	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
302.7 With Limited Manipulation	FPC	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
302.8 With Limited Reach and Strength	FPC	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
302.9 With Limited Language, Cognitive, and Learning Abilities	FPC	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.

Section 508 — Chapter 4: Hardware

Not Applicable. ScreenSteps is a software-only application. Chapter 4 Hardware criteria do not apply.

Section 508 — Chapter 5: Software

Criterion	Level	Conformance Status	SFBRN Note
501.1 Scope – Incorporation of WCAG 2.0 AA	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
502.2.1 User Control of Accessibility Features	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
502.2.2 No Disruption of Accessibility Features	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.

Criterion	Level	Conformance Status	SFBRN Note
502.3 Interoperability with Assistive Technology	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
502.4 Platform Accessibility Features	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
503.2 User Preferences	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
503.3 Alternative User Interfaces	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
503.4.1 Caption Controls	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
503.4.2 Audio Description Controls	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
504.2 Content Creation or Editing	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
504.2.1 Preservation of Information Provided for Accessibility in Format Conversion	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
504.2.2 PDF Export	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
504.3 Prompts	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
504.4 Templates	Ch. 5	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.

Section 508 — Chapter 6: Support Documentation and Services

Criterion	Level	Conformance Status	SFBRN Note
602.2 Accessibility and Compatibility Features	Ch. 6	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
602.3 Electronic Support Documentation	Ch. 6	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
602.4 Alternate Formats for Non-Electronic Support Documentation	Ch. 6	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
603.2 Information on Accessibility and Compatibility Features	Ch. 6	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.
603.3 Accommodation of Communication Needs	Ch. 6	Not Evaluated	Not covered by the vendor's VPAT; flagged for independent third-party testing.

Reference tables are SFBRN scorecard summaries, not mirrors of the vendor VPAT; full vendor remarks appear only in Section 2 barrier cards. Criteria not covered by the vendor's VPAT are marked Not Evaluated per SFBRN policy.
