

Accessibility Test Report – Student Center Appspan

- **Test Date:** 2/28/2020 – 3/2/2020
- **Test URL:** mydev.csusm.edu in the CBSMTRS instance
- **Requesting Purchaser:** N/A – Already purchased. Requesting reviewer: Diane Petersen

Executive Summary:

This report contains errors captured as a result of a cursory Accessibility and Usability test conducted based on CSUSM Accessibility testing criteria based on WCAG 2.1 AA, Section 508, and CSU ATI Accessibility Requirements. These criteria include series of accessibility requirements that bare the highest importance that need to be addressed and resolved.

The test results are divided into four sections by priority:

- **Critical:** The user is unable to complete their task because of this issue.
- **Major:** The user will need to figure out a workaround in order to complete their task because of this issue.
- **Minor:** The user will be able to complete their task, but this issue will interfere.
- **Pass:** The user will be able to complete their task.

Within the sections, the results are further divided into categories by how they might affect the user and have multi-faceted questions, when applicable, to determine the severity of the test result findings.

Testing Platform:

- **Browsers:** Chrome Version 80.0.3987.122
- **Assistive Technology:** JAWS 2019

Results Summary:

Product was tested on a development account with staff permissions. Some failures of the product were found and are noted below:

Minor Failures:

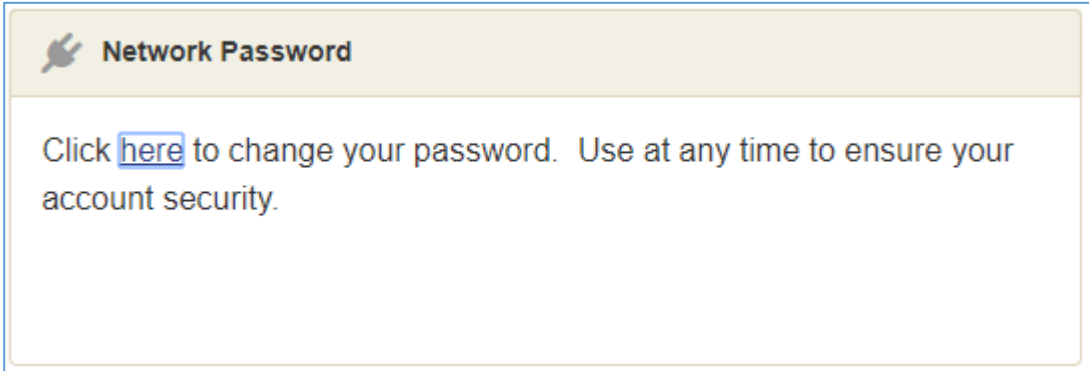

- An accessibility statement is advised in being added to the product. This statement should outline the commitment to accessible products for all audiences, information on how to report issues if they arise, and general contact information if assistance is required.
- Some link phrases were not descriptive and should be altered.
- Color contrast needs to be improved in some cases.

Recommendations for these findings can be found in the [Recommendations](#) section of this report.

Accessibility Evaluation:

Evaluation Focus	Findings	Result
Is there a link to an accessibility statement in the product?	No accessibility link noted at time of test. Would recommend adding in a link to the campus accessibility statement -or- info on how users can request help somewhere on the site.	Fail - Minor
Is the navigation theme consistent across the product?	Navigation of site looks to be consistent across test instance	Pass
Is there a Skip Navigation feature?	Skip to main content is present on site.	Pass
Is the product keyboard operable? • Is there visual focus when the product is tabbed through?	Product is keyboard operable. Visual focus looks to be browser default and is able to be seen on the current template's white background and light blue navigation background. No keyboard traps found.	Pass

• Can all interactive elements be navigated to by tab? • Are there are noted keyboard traps?		
Does the tab order follow a logical order on the page?	Tab order looks to be in a logical order	Pass
Are there tool tips presented? If so, can they be consumed by assistive technology?	Tool tips were presented in some test instances and were able to be consumed by assistive technology.	Pass
Is there scrolling content present? If so, can the scrolling content be paused, stopped, and navigated to and from.	N/A – no scrolling content	N/A
Can the screen be resized to 200% without loss of product functionality?	Screen can be resized to 200% without loss of functionality	Pass

Is there any content not announced to an assistive technology user?	All content are announced to assistive device at time of test.	Pass
Are the links descriptive? • If not, do they contain Title Attributes to differentiate them from other generically phrased links? • Are icons being used as a link? If so, does it give meaningful information about the destination page?	Some links are descriptive but not all. The following instances should be made to a descriptive phrase that can be read independently of the rest of the sentence.  The above should be changed to: “Change your password. Use at any time to ensure your account security.” In the Student Center if navigated with assistive technology and only using the tab function all of the collapsed menus are read out to the listener as the same phrase. Red box drawn around menus for emphasis:	Fail - Minor

	Amanda's Student Center ☰ Academics Search > Degree Planner > Enroll > My Academics > ARR (Graduation Eval) > You are not enrolled in classes. ☰ Finances My Account Account Inquiry > Enroll In Direct Deposit > Account Itemization > Financial Aid View Financial Aid > Accept/Decline Awards > You have no outstanding charges at this time. *Important Student Fee Information ☰ Personal Information Emergency Contact > Contact Information	
If a web product – are the Page Titles meaningful?	Page titles look to be meaningful in test instance	Pass
Is appropriate color contrast used?	Appropriate color contrast is used in most instances, but the following were noted at issues:	Fail - Minor

Is information being conveyed by color only?	 Announcements <u>FALL 2019</u> NEW - The new Extended Learning Building (ELB) is now open! It is located on Barham and Campus Way near The QUAD. Students are welcome to NEW - Permission Numbers No Longer Needed Week 1 During the first week of classes, if the class shows as open (green on the class schedule) During the second week of classes, a permission number will be needed for enrollment TUITION & FEES Due August 21, 2019. Visit the Student Financial Services website for more info. TERM START DATE Classes begin August 26, 2019. The red (#FF0000) used for important dates in “Tuition & Fees” does not pass color contrast requirements. Using a darker red such as: #E60000 it will pass and is a very subtle change.	
Are there headers on the product’s content? If so, are they in order?	Headers look to be used in an appropriate order on page content.	Pass
Are datatables present?	Tables found in test instance look to have proper mark up	Pass

If so, do they have proper mark up (id and table headers)?		
Are there images presented? If so, do they have appropriate alternative text?	Images have meaningful alt text and contextually make sense in test instance.	Pass
Are forms used? • If so, are form field's present? • Are form fields labeled correctly? • Are required fields communicated to assistive technology users? • If error messages that are displayed when improperly filling out a form field, is the alert understandable and can it be consumed by	Forms are present in product but were found to be accessible. Fields were labeled correctly, communicated to assistive technology, and error messages were able to be consumed by assistive technology.	Pass

assistive technology r? • If the form's output changes based on the user's input (i.e. such as search results) – does the change notify the user?		
Is there multimedia present? • If so, are they captioned accurately? • Is the media player accessible via keyboard access?	N/A – no multimedia noted at time of test	N/A
Is the content presented consistent when CSS is disabled?	Content is presented in a consistent manner when CSS disabled.	Pass
Physical Products: • Are there any concerns about the inability to interact with hardware for	N/A – online only	N/A

users with mobility impairments? • Are there any gestures required to complete tasks in the product?		
---	--	--

Recommendations

It is recommended that:

- An accessibility statement is added to the footer of the site, if possible. This statement should outline the commitment to accessible products for all audiences, information on how to report issues if they arise, and general contact information if assistance is required.
- Link phrases should be made to be unique and descriptive so that they can be read independently
- Color contrast is adjusted.
